# MANHOOD.

In the young and billing generation, the vegetative powers of life are strong, but in a few years how often the pallid hue, the lack-lustre eye and smaclated form, and the impossibility of application to mental effort, show its baneful indicence. It soon becomes evident to the observer that some depressing intence is checking the development of the body. Continuing in talked of, and perhaps the youth is removed on the school and sent juto the country. This is one of the worst movements. Removed from ordinary discretions of the ever-changing scenes of the city, the owers of the body too much enfeebled to give zest to a statiful and rural exercise, thoughts are turned inward upon themselves.

If the patient be a formale, the approach of the menses it coked for with anxiety, as the first symptom in which Nature is to show her saving power in diffusing the circulation, and visiting the check with the bloom of health. Alas! increase of appetite has grown by what it fed on, in the energies of the system are proturated, and the whole economy is deranged. The beautiful and wonder-ul period in which body and and underge so fascinating a change from child to women, is looked for in vain; he parent's heart bleede in any level.
